

# PRCL301 - Parcel Universal Carrier Module Training Agenda

## Course Synopsis

- ▶ This class is intended to provide the reference for any changes that may be required for any of the functional areas. Changes can be made by the carrier, the customer, BluJay professional services, partners, or any combination thereof.
- ▶ While the UCM administration console has an intuitive user interface, training in the use of the UCM module is a prerequisite. The prerequisite ensures that UCM carriers behave and integrate through the BluJay applications in a consistent manner.
- ▶ It includes a sample carrier module which can be used as a template for adding new carriers.

## Suggested Attendees

- ▶ This course is meant for Technical and Business Analysts at the customer who have the necessary skills and may be required to develop and add a new carrier module

## Pre-Requisites

- ▶ PRCL101-Parcel User and Admin Training.
- ▶ Technical skills including high level understanding of Java Scripting (JS)

## Learning Objectives

- ▶ It will allow relevant users to be able to add additional carrier(s) within the Parcel application which are not delivered as part of the standard install.
- ▶ Bringing new UCM carriers and services is accelerated when this workbook is used. A more detailed description of any of the areas of this workbook, including examples of standard functions that were not selected as part of the configuration of the sample Customs Management template, can be found in the BluJay UCM Manual.

## Duration

- ▶ The standard agenda for this training is for one day.
