Transportation Management

Accelerate the **speed, accuracy and transparency** of your logistics and transportation processes

Features for LSPs

OVERVIEW

BluJay Transportation Management is a complete, integrated software solution that manages the entire logistics operation from front to back, handling multiple languages, currencies, and time zones. The integrated cross dock and warehousing modules with available yard integration allow LSPs to manage all multimodal transportation and (temporary) storage activities for one shipment and produce an itemized customer invoice.

SOLUTIONS AT A GLANCE

- Multimodal transportation management
- Provides complete control over the order-to-cash process
- Visibility and reporting
- Planning and execution
- Carrier selection
- Rating engine
- FTL, LTL, groupage, network
- Cross Dock and Warehouse Management integrated with the TMS
- Available integration with BluJay's Yard Management application
- Integration to third-party onboard computing
- Agile, scalable platform that adapts and grows with your business

KEY FEATURES

- Strong order management supporting different operating models and business rules
- Supports single side to complex multi-depot/multi-country requiring multiple networks
- Automatic planning scenarios allow you to more efficiently utilize resources, control costs, and minimize empty distance
- Smooth handling of non-conformities and irregularities
- Advanced cross dock handling
- Revenue and cost allocation insight
- Integrated rating engine
- KPI and reporting dashboard
- Easy integration with customers, suppliers, and third-party systems to ensure seamless processing, maximum efficiency, and minimal costs

SOLUTION

Transportation Management supports the core business processes that connect your logistics operation. It offers extensive integration possibilities with accounting systems and customs compliance solutions, as well as with customers and trading partners. The result is a common platform, integrated modules, and centralized data that increases efficiency and enhances customer service.

The solution can be deployed to suit your business, either SaaS / cloud, or on-premise. BluJay's proven implementation process gets you up and running quickly, accelerating business benefits, and your return on investment.

This powerful, easy-to-use transportation management system (TMS) provides a feature-rich comprehensive toolset to help manage and control the variables associated with monitoring service level agreements to making the best use of available capacity.

The web-based transportation module is suitable for organizations that maintain their own assets or work with transportation partners. It supports LSPs that offer the following services:

- 3PL, trucking, and road forwarding
- Less than truckload (LTL) / groupage
- Full truck load (FTL) and contract
- Container transport network distribution
- International transport
- 4PL transport

ABOUT BLUJAY SOLUTIONS

BluJay Solutions delivers supply chain software and services to the world's most progressive retailers, distributors, freight forwarders, manufacturers, and logistics service providers. Transforming supply chain logistics with the BluJay Global Trade Network, we enable customers to unlock the power of more than 40,000 universally connected partners. With BluJay, companies can achieve greater trade velocity, transform their supply chain economics for disruptive advantage, and see beyond the horizon to optimize their future in the global economy.
