

# Warehouse Management

## Out-of-the-box warehouse operations and inventory movement management

### OVERVIEW

Blujay Solutions' Warehouse Management is an out-of-the-box, easy-to-use warehouse management system (WMS) that goes much further than simply showing you the level of stock in your warehouses. This integrated solution offers a seamless experience for managing order flow through the warehouse. By providing real-time access to accurate stock information and reporting, Warehouse Management enables you to always know exactly what stock is available and where it is located for onward distribution.

### SOLUTIONS AT A GLANCE

- › Warehouse management
- › Cross docking
- › Bonded warehousing Cross Dock and TMS integrated with the WMS
- › Available integration with Blujay's Yard Management application
- › Pick and pack
- › Cycle counting
- › Automatic replenishment
- › Quarantining
- › Carrier connectivity
- › Customs connectivity
- › Easy integration with other business systems and RF/Material Handling Equipment (MHE)

### KEY FEATURES

- › Reduce costs, errors, and time with straight-through data processing
- › Maximize shelf life with efficient rotation of stock by batch/product code through automatic replenishment
- › Rapid integration with internal systems and those of customers and partners using pre-defined XML data formats
- › Built in EDI engine ensures straight-through processing of data, reducing errors and costs, and speeding up processes
- › Achieve closer integration with transport partners through better stock visibility and enhanced business agility
- › Meet the evolving requirements of your business and customers with support for public, dedicated and bonded warehousing

## SOLUTION

Blujay's Warehouse Management provides a complete and integrated platform to optimize order flow and improve customer service. It allows you to manage multiple sites from one virtual warehouse, with public and dedicated warehousing supported. Setup is fast and flexible, enabling you to bring new customers, brands and product lines on board quickly and easily.

Part of Blujay's Global Trade Network (GTN), Warehouse Management is deployed using pre-configured, standard templates that are designed to meet the needs of different types of logistics models.

The solution is designed to support logistics service providers and freight forwarders who manage inventory and distribution on behalf of their customers, or shippers who manage their own warehouse operations.

With Blujay's Warehouse Management, you have access in real-time to critical information such as:

- › How many items have been dispatched
- › How many have been refused and returned
- › How many returned items are waiting to enter your quality assurance process before being returned to stock

All of this combined helps you stay in control of your critical inventory.

## ABOUT BLUJAY SOLUTIONS

Blujay Solutions delivers supply chain software and services to the world's most progressive retailers, distributors, freight forwarders, manufacturers, and logistics service providers. Transforming supply chain logistics with the Blujay Global Trade Network, we enable customers to unlock the power of more than 40,000 universally connected partners. With Blujay, companies can achieve greater trade velocity, transform their supply chain economics for disruptive advantage, and see beyond the horizon to optimize their future in the global economy.
