

# Yard Management

## Management and visibility for trailer yards

### OVERVIEW

Blujay's Yard Management Solution is a complete, integrated software solution that offers standardized processes through automation, and maintains visibility throughout the supply chain – from trailer contents to vehicle movements. The solution manages the entire yard operation from appointments, to gate-in and gate-out, dock management, and yard activities like shunting between dock and yard location. Part of Blujay's Warehouse GTN family of products, Yard Management is fully integrated with Transportation Management, and MobileSTAR, allowing you to manage all trailer yard-related activities for your own or contracted fleets.

### SOLUTIONS AT A GLANCE

- › Multi-modal
- › SKU- and pallets-based goods tracking
- › Unitized goods (pallets, containers, boxes) and shipment-based cargo (HAWB/HBL)
- › Visibility of trucks and trailers available, as well as their status
- › Integrated with Transportation Management, Warehouse Management, Cross Dock, and MobileSTAR
- › Agile, scalable platform that adapts and grows with your business
- › Easy integration with carriers and third-party systems
- › Part of Blujay's Global Trade Network ecosystem

### KEY FEATURES

- › Full and real-time visibility of shipments, yard inventory, and security
- › Manage equipment and resources in the yard
- › Prioritize shipment arrivals
- › Identify trailer contents
- › Manage yard and jockey activities
- › Seal check configuration
- › Driver blacklisting control
- › User-defined dashboard with persistence
- › Standard masters with upload function
- › Configurable layouts for equipment screen
- › Mobile app for drivers

## SOLUTION

Blujay's Yard Management supports the core operational yard processes required for your logistics operation. It is designed as a component of the multi-modal Transportation Management and Warehouse Management suite. Yard Management can also be a stand-alone offering for 3PLs. Unlike other YMS solutions that are locked to a WMS or TMS, Blujay's Yard Management offers extensive integration possibilities with in-house or third-party solutions.

Yard Management can be deployed to suit your business, preferably cloud-based SaaS, however on-premise is also possible. An easy implementation process gets you up and running quickly, accelerating business benefits and your return on investment.

The web-based Yard Management module is suitable for organizations that maintain their own assets or work with transportation partners, with a reasonable amount of inbound and/or outbound traffic. Yard Management is ideal for the following types of customers:

- › LSPs/3PLs
- › Shippers
- › Manufacturers
- › Distribution Centers

Yard Management is suitable for the following types of warehouses:

- › Pick and pack operations/warehouse and distribution
- › Cross-dock terminals
- › Cargo warehouses
- › Container freight stations
- › Ground handling airfreight operators

Blujay's Yard Management automates processes in the yard, providing visibility and increasing efficiency of operations.

## ABOUT BLUJAY SOLUTIONS

Blujay Solutions delivers supply chain software and services to the world's most progressive retailers, distributors, freight forwarders, manufacturers, and logistics service providers. Transforming supply chain logistics with the Blujay Global Trade Network, we enable customers to unlock the power of more than 40,000 universally connected partners. With Blujay, companies can achieve greater trade velocity, transform their supply chain economics for disruptive advantage, and see beyond the horizon to optimize their future in the global economy.
